## Summary:

I am currently a front-end developer and graduate of the UNCC coding bootcamp. I specialize in the MERN stack for web development, including skills in both the front end and back end. Ideally I would love to work with several current, and up to date technologies with relation to front-end development.

## Skills:

**Front-end:** HTML 5, CSS3, Javascript, React, jQuery, Ajax, RESTful API creation/consumption, handlebars.js, Bootstrap, Bulma, Twilio, Twilio Flex, TwiML, Jest.

**Backend:** Node.js, MySQL, MongoDB, MySQL Server, express, sequelize ORM, Mongoose ORM passport.js.

## Projects:

**Let's Guess** | <https://github.com/lynseahoss/Lets-Guess> | <https://andrewpaulgreer.github.io/andrew-portfolio/>

Let's Guess is an online browser based rendition of the classic "Guess Who?" game. This is a simple, and easy to play game utilizing several current technologies such as React, JS, and MongoDB to power the functionality, logic, and storage.

*Technology used:*

- React, Bulma, HTML5, Javascript, react router, react context, MongoDB, Mongoose ORM, Node.js, Passport, RESTful API's.

**ShopByYou** | <https://github.com/JRivera-31/ShopByYou> | <https://shopbyyou.herokuapp.com/>

Template based online store to demonstrate knowledge of how an ecommerce platform works. ShopByYou is a full stack application that sends client side input to a MySQL database and retrieves the information using express.

*Technology used:*

- Semantic UI, Handlebars, Multer, Google Cloud Bucket, bcrypt.js, Javascript, jQuery, Node.js, Sequelize, MySQL, Express, Express-Handlebars, Passport, Express-Session.

**Groovy Concert Search** | <https://github.com/andrewpaulgreer/Project1> | <https://andrewpaulgreer.github.io/Project1/>

Groovy Concert Search is a front end application that utilizes jQuery to pull on several different server side APIs and 3rd party APIs to display information to the user about relevant information for concerts, and the preferred city to see a show.

*Technology used:*

- HTML5, CSS, Bulma, Particles.js, Moment.js, Javascript, jQuery, Client-Side APIs.

## Professional Experience:

**Easyfish Marketing**, Charlotte, NC

April 2020 - Present

Frontend Developer

- Building a contact center application configuring Twilio flex with our ActiveCampaign CRM to create an in house call management platform that will allow salespeople / client service workers to manage inbound and outbound calls more efficiently.
- Creating a React Native mobile application for both android and iOS, linking service workers with their company's social media profiles via geo tracking of the metadata on images taken at job sites.

- Mobile application will increase location matched search results on the basis of the geographic location of before/after photos uploaded to a firebase DB supported by google, and create communication with Google My Business via API calls.
- In early stages of developing an AI web chat bot through Twilio services, as an add-on to client websites to handle commonly asked questions, in order to reduce customer care costs.
- Participating in daily standup meetings to discuss what we shall be developing for the day.
- Given flexibility and decision making abilities with regards to tools and technologies used in projects.

#### Technologies Used:

- React.js, React Plugins, React Reducer and Redux (state management), React Native, Javascript, Node.js, Express.js, Axios, MVC, CRUD, HTML, CSS, REST API creation, TwilML scripting, Twilio API, Twilio Flex, Expo CLI, Firebase, Firestore.
